

caliente -- Joan Chirinos, Aaron Li, George Liang
APCS pd08 Final Project -- (meme)-age 2018-5-31

Memeage

- + setup(int) //Instantiates new playlist or slideshow based on choice
- + pause() //Completely stops image
- + play(int) //Cycles through images in a playlist or slideshow with specified delay

Image

- + image(String,String) //create a new image given the filepath and a new name for the image
- + String getName() //Returns current image's name

Playlist

- DList<image>
- + void skip() //Skips to next image in playlist
- + void previous() //Jumps back to previous image in playlist
- + void add(int) //Adds a new track at specified node
- + void remove(int) //Removes track at specified node
- + void shuffle() //Shuffles order of images in DList

Slideshow

- Stack<image>
- + void next() //Jumps to the next image. Unlike a playlist, this is irreversible.
- + void add() //Adds to top of stack
